

Ortech provides design and installation of reinforcement for office, suits and any working and living space, without changing its atmosphere, looks and functionality. The reinforcements provide extra protection against bullets, blast, ballistics and shrapnel hits. Ortech reinforces spaces regardless of their original construction method and condition, without the need for constructive modifications or building permits.

## Main features:

- Fiber-Reinforced Plastic — HFRP panels for offices and suites protection
- Fast Implementation without interference to the daily activity
- Proven to protect lives and facilities against hundreds of kilograms of explosives
- Modular and flexible to future design changes
